Tárgy:INQUA session proposals 31 MARCH 2018

Dátum:Wed, 28 Feb 2018 12:35:24 +0000

Feladó:Keith Bennett <sci-prog@inqua2019.org>

INQUA National members:

Many thanks indeed for all the session proposals for INQUA 2019 Dublin received so far! There is a list on the congress website at <http://www.inqua2019.org/programme/proposed-sessions/>, updated weekly (probably more often during March).

This is mostly a reminder that the call for scientific session proposals is still open, but will be closing on 31st March 2018. Full details of the information needed at this stage are available on the 20th INQUA Congress website (<http://www.inqua2019.org>), along with a list of currently proposed sessions. You can also keep in touch with developments by Facebook (INQUADUB2019) and Twitter (INQUADUB19).

Please feel free to get in touch about any aspect of this. We're working to make this a really strong and stimulating Congress, and welcome all ideas for scientific sessions that can contribute to that, in any area that touches on Quaternary research. We are keen to ensure that the session coverage is appropriate both globally and regionally, so proposals for relevant regional sessions are especially welcomed.

We will be reviewing all proposals after 31 March, with a view to merging proposals where that seems merited, and soliciting additional proposals where there seem to be gaps in coverage (regionally or by subject area).

I have sent this email to those listed as contacts on INQUA's webpage: please let me know if this is incorrect or has changed.

Please forward this email to anyone who might be interested. We look forward to receiving all your session proposals, and to seeing you in Dublin in 2019!

Cheers,

keith

Prof. K.D. Bennett MRIA
